# Smart Contract Audit

*BNBtiger 2.0*

October 31<sup>th</sup>, 2023

# Disclaimer

By proceeding to engage with the contents of this report, you explicitly acknowledge your acceptance of the terms outlined in this disclaimer. This report is a product of comprehensive analysis conducted by individuals recognized as experts in the blockchain industry. The focus of this analysis is restricted to the evaluation of smart contract code and the pertinent data stored on blockchain networks.

The information presented herein is made available 'as-is,' devoid of any express or implied warranties, including but not limited to, warranties of accuracy, completeness, or fitness for a particular purpose. It is crucial to underline that this report is not, and should not be construed as, financial advice.

While meticulous efforts have been exerted to ensure the reliability and accuracy of this report, the onus of conducting independent verification and due diligence falls squarely on you. DesuFi, along with its team members, affiliates, and contributors, disclaims all liability for any direct, indirect, incidental, or consequential losses, damages, or any other adverse effects that may occur as a result of inaccuracies, omissions, or errors in this report. Furthermore, DesuFi shall bear no responsibility for any actions taken, or decisions made, based on the information provided in this report, either by you or any third-party entity.

# Overview

The objective of this report is to conduct a comprehensive audit of the smart contract in question. The audit aims to scrutinize various aspects of the smart contract, including but not limited to its overall architecture, codebase, and functionalities.

# Contract Issues

Compiler errors	Passed
Oracle calls	Passed
Emit function fidelity	Passed
Timestamp dependence	Passed
DoS with revert	Passed
DoS with block gas limit	Passed
Private data leaks	Passed
Safe OpenZeppelin usage	Passed
Fallback functions	Passed
Timestamp dependency	Passed

## Summary

No contract issues have been identified.

# Security Issues

## Exploits

Dangerous vulnerabilities that will lead to loss of funds and or impairment of the contract and its functions.

No issues present.

## Function Bugs

Significant bugs or mistakes with isolated impact, affecting only specific functions of the contract without compromising overall functionality.

No issues present.

## Trivial Mistakes

Syntax or spelling mistakes that are of no consequence to the functionality of the contract.

No issues present.

## Summary

No security issues have been identified.

# Team Privileges

## Tradability

Some smart contracts may contain functions that can freeze all swaps.

There is a max wallet limit.

## Minting

Minting new tokens post-launch can plummet the value of existing tokens.

Team cannot mint new tokens.

## Blacklisting

Blacklisting can prevent wallets from swapping the tokens that they hold.

There is no blacklisting feature.

## Tax Levels

Excessive taxation can decrease or in some cases eliminate all trader profits.

Each transaction is taxed.

## Summary

The team no longer has control over the contract since ownership has been renounced.

# Contract Features

- Each transaction is taxed.
- Taxed tokens are swapped to network native tokens and sent to the team wallet.
- There is a maximum wallet balance limit.
- Tax level and max wallet limits can be changed by the owner address; however, ownership has been renounced.

## Summary

The contract functions as intended and contains no misbranded features.

# Final Review

No contract issues have been identified.

No security issues have been identified.

Contract features are clear and they work as intended.

The team has negligible control over the contract since ownership has been renounced.
